* To qualify for the list, companies must have their headquarters in Atlanta (subsidiaries of other companies are not included); must have 2008 revenue between \$1 million and \$300 million; and must have two-year growth in sales of more than 50 percent. Companies are ranked by a growth index formula, which is used to even the playing field among companies of different sizes. The revenue and employee growth indexes are the percent change from 2006 through 2008 multiplied by the absolute change for the same years. A company's average employee or revenue growth index is the growth index divided by the average growth index of all companies that qualify. The weighted average growth index is a company's average employee index score plus its average revenue index score. Employee growth was weighted 40 percent and revenue growth was weighted 60 percent.

^A Company submitted a statement of verification supporting figures.
